

Dali City – Yunnan, China

As one of China's most well-known ancient towns, Dali has lots of cultural sites and historic architectures, such as the fortification gates and walls of Dali Ancient Town, with so much to offer, it is the chosen land for tourism and sightseeing. Nighttime entertainment and activities flourish as millions of tourists come to this town for relaxation every year. Today's Dali is a heavenly place mixed with modern prosperity and old fashions. The colorful nightlife has become part of the city's identity. With the ambition for further growth, the local government decided to improve the city's look. Hence comes OSRAM Lighting Solutions.

The ultimate centralized city management platform – OSRAM SYMPHO™City was selected and installed. In an area of more than 100 kilometers, it manages 345 buildings and over 20,000 luminaires with top-notch intelligence. The SYMPHO™City platform guarantees smart citywide management, connection of complex systems and management of asset and risk, significantly improving the cost-efficiency ratio and reducing the complexity of maintenance and control. Now, Dali glows in new radiance with OSRAM customized OLUX® Linear, OLUX® Flood and Dot luminaires controlled by e:cue Butler PRO, Butler S2 and the SYMPHO™City centralized management platform

The project tremendously betters Dali, and brings not only more beautiful scenery, but brighter and safer spaces for the locals and tourists, injecting new vitality to the night economy. It enriches the nocturnal tourism resources of Dali and enhances its image as one of the most arresting destinations in the country, bringing new opportunities for further growth and bettering the life of more than 650,000 residents.
