

SHOWCASE

Carat

Whether Sapphires, Rubies or Emeralds – Carat has become the new name for gemstone jewelry. Traxon installed its Floodlight 3/225 RGB throughout the entire store to create a unique ambience of colorful light. Using the whole advantages of LED - energy efficiency, durability and low heat - the 675 high performance LEDs of the Floodlight provide Carat a generous and powerful lighting output warranting a smooth as well as enticing illumination of its jewelry range. Sophisticated DMX technology allows for the emergence of any desired coloring and color changing effect. The stand-alone mode of the control system enables Carat an easy exchange of the lighting show without the use of a computer. The user-friendly control system works with standard interchangeable SD memory cards for full lighting control flexibility.
