

SHOWCASE

Sushi Samba - Israel

For the fifth branch of the 'Sushi Samba' chain located in the heart of Tel Aviv, the developer and architects of this concept created another lively experience of the South American and Japanese cross-over. Traxon's Wall Washer XB-18 fixtures were mounted behind the bar of the sushi treadmill, behind a Mondrian-inspired mural. Illuminated in orange, red, green, yellow and combined with pulsating music, the colorful décor evokes South America's energy, contrasting to the dining area of Sushi Samba, held in a Japanese aesthetic. Wall Washer XB-36 fixtures are installed behind a wall lined with delicate steel cutouts which beam in a rich wall washing effect. To meet the demands of Sushi Samba, the highly adaptable XB Luminaires Line with its highly customizable features turned out to be the optimal lighting system for the extraordinary venue.
