

SHOWCASE

Club Q – Switzerland

Club Q in Zurich, Switzerland uses color and light as inspiration for creating a dazzling atmosphere which combines vibrating beats with stylish interior. Equipped with Traxon's Mirror 64PXL Wash, the wall behind the DJ booth transforms the main floor into a visually compelling area featuring a Sound-to-Light Control System. The bars are illuminated with seamlessly fitting, directly interconnected Strips RGB. The Strips have a slim profile and wide beam angle of 120° ensuring a generous spread of light and generating a myriad of colors in a space restricted location. This showcase of state-of-the-art technology at the heart of Zurich's nightlife has been developed in collaboration with Engineered Entertainment and Bogen Design. Dive into the experience of light – Traxon Technologies.
