

SHOWCASE

Haddasah Hospital - Israel

In front of Jerusalem's Haddasah Hospital, an artwork consisting of three transparent columns filled with water is lit up by Traxon's Wall Washer XB-36. The ensemble that embellishes the driveway to the medical center was developed together with Designer Noa Lev and forms part of the institutions engagement and support of arts. The highly customizable characteristics of the XB Luminaires enable indoor and outdoor applications. The beam angle of the Wall Washer XB enlightens the exhibited sculptures and focuses the artworks in a ray of mesmerizing light. Controlled by Traxon's Lighting Management System, the illumination of the three columns can be operated individually and offers a multitude of lighting possibilities.

FEATURED PRODUCT

Wall Washer XB-36
XB-WB-32132

METHOD OF CONTROL

LED Engine XB
AC-XB-00202

PROJECT DETAILS
